## **IMPORTANT THINGS TO DO IN CASE OF INJURY**

### THE EMPLOYER SHOULD:

- 1. Provide all necessary medical, surgical and hospital treatment from the date of accident.
- 2. Every employer shall keep a record of all injuries received by employees and make a report within 10 days thereof in writing to the Office of Workers' Compensation
- 3. Ascertain the average weekly wages of the employee and provide compensation in accordance with the provisions of the law, for disability *beyond the third day* after the accident. All agreements as to compensation must be submitted to the Office of Workers' Compensation for approval.

### THE EMPLOYEE SHOULD:

- 1. Immediately notify the employer in writing of accidental injury or occupational disease and request medical services. Failure to give notice or to accept medical services may deprive the employee of the right to compensation.
- 2. Give promptly to the employer, directly or through a supervisor, notice of any claim for compensation for the period of disability beyond the third day after the accident. In case of fatal injuries, notice must be given by one or more dependents of the deceased or by a person on their behalf.
- 3. In case of failure to reach an agreement with the employer in regard to compensation under the law, file application with the Industrial Accident Board for a hearing on the matters at issue within two years of the date of accidental injury or one year of knowledge of the diagnosis of an occupational disease or an ionizing radiation injury. All forms can be obtained from the Office of Workers' Compensation.
