

# Loss Control and Risk Management

Oryx offers clients comprehensive loss control services for a wide range of construction settings. Our systematic loss control services are designed to lower injury and illness rates by identifying, evaluating, and controlling workplace hazards.

## **Oryx's Safety Services Include:**

**Job Site Inspections:** Oryx's trained field staff will provide safety inspections that will assist your clients in identifying and correcting unsafe conditions that can lead to costly accidents. A comprehensive report is provided to the agent and insured following each inspection. All reports are based on OSHA Code of Federal Regulation manuals 1910 and 1926.

**Health and Safety Training:** Rely on Oryx for training designed to prevent accidents that cause injuries or illness. We provide health and safety training designed specifically for the construction industry. A portion of the available classes and programs accessible to Oryx clients are: OSHA Authorized 10 and 30-hour, Industrial and Construction Safety Training, Toolbox Talks, Respiratory Protection & Voluntary Respiratory Protection, Hazard Communication, Personal Protective Equipment (PPE), Scaffolding and Aerial Safety, Lockout/Tagout, Excavation & Trenching, Forklift Compliance and Confined Space Safety Programs.

**Safety Program Audit:** Oryx offers a comprehensive audit to help employers ensure that their health and safety programs are compliant with current OSHA standards.

**Accident Investigations:** Oryx's field staff is trained to thoroughly investigate accidents to determine the facts that lead up to a loss occurrence. Expert testimony based on the investigation can then be utilized for third party documentation.

## **Written Health and Safety Policies and Procedures:**

The key to preventing accidents is to establish and implement written health and safety policies and procedures that clearly communicate your client's commitment to a safe working environment. Oryx can assist your clients in preparing policies and procedures that address both company specific health and safety concerns and general OSHA requirements.

Oryx's loss control team has over 40 years experience in industrial and construction safety and loss control. Oryx's staff will work with you and your insured's company management team to develop a cost effective, comprehensive safety program tailored to the clients needs.
